## SUSPENDED ACOUSTIC SYSTEM

In a new era of architectural design, intimacy and acoustic comfort within work environments are at the forefront.

Combine that with vision and the result is a harmonious suspended acoustic element which is created from two-dimensional profiles assembled to unveil a three-dimensional geometric shell acting as a barrier for reverberating sound within spaces.

Whether it be over desks and meeting tables or as artistic volumes in large open areas HARMONY encompasses style, form and function with the additional appeal of having the choice of a vast array of solid, patterned or customisable panels to create unique solutions.
