For every company size.

*100%*  
**recyclable**

Chatpod is built from sustainable materials that can be re-used after the end of life.

**25**  
**millions**

PET bottles are processed annually by Impact Acoustic, including the Chatpod.

**Jeffrey Ibañez,**  
*Designer*

Studies have found that in open-plan offices, contrary to the actual idea, people communicate less with each other: direct conversations are declining, and e-mail activity is increasing instead.

Designer and architect Jeffrey Ibañez had the vision to change this: What if we gave people working in open-plan offices more privacy or a special protected space to think freely? How can we address the massive climate and resource problems on our planet and still create a high-quality product? The idea of the Chatpod was born.

A truly sustainable product, made in Switzerland from renewable resources, with the aim of improving quality in offices around the world.

Are you ready for the future of workplaces?

## Chatpod 700

# What makes Chatpod so *unique*

## 1 **Production**

We manufacture in Switzerland and only use sustainable materials. Our Chatpods are made from cardboard, sawdust, rubber and recycled PET bottles. Local foundations and handicapped professionals support us in the production.

## 2 **Acoustics**

Trust us, we are experts in room acoustics. The interior of the Chatpod is soundproof, while the acoustic exterior cladding reduces ambient noise. Scientifically tested, of course.

## 3 **Colours**

Our carefully curated colour palette offers you the freedom to pick from 32 colours. The frame colour also matches the existing furniture and is available in 32 colours. Which combination would you like?

## 4 **Assembly**

All Chatpods are delivered pre-mounted. Thanks to the simple assembly instructions, the boxes can be easily assembled with a little manual skill. The smallest configuration can be assembled in 20 minutes, so that you have time for the important things.

## 5 **Hygiene**

An automatic ventilation system ensures a cool head and mind. PET fibres, glass and metal parts can be easily cleaned and disinfected.

# The future of the workplace now comes in *five* sizes

## Chatpod 185

Compact telephone booth with space for one person standing. Ideal for short phone calls, video calls or short focus breaks.

## Chatpod 300

Thanks to the height-adjustable table, you always have the perfect position for any task. Ideal for concentrated and focused work.

## Chatpod 350

The solution for two-person conversations and short meetings. The benches are equipped with comfortable acoustic upholstery.

Avant

Back

Interior

## Chatpod 700

Our most flexible configuration with space for up to four people, also available as a variant with standing table and optional whiteboard or screen holder.

Side

Side / with benches

Side / with high table

Interior / with high table

Front / with high table

## Chatpod 1200

Our largest Chatpod accommodates up to six people and is available with flexible furniture, both for sit-down and stand-up meetings. Of course, the box has power outlet and various USB ports.

## Highest flexibility

The Chatpod in your office is very easy to move and can also be reconfigured and expanded later according to your needs. In just a few steps, a two-person module becomes a four-person module and can be expanded to an unlimited depth. We also offer a whiteboard or a screen holder as optional features.

# Unique *features*

**1 LED lighting module with focused light beam** by Bartenbach – optimised for concentrated work

**2 Automatic ventilation system**  
Fresh, quiet and clean

**3 Acoustic interior and exterior cladding from certified ARCHISONIC® material**  
Soundproofing from the inside and outside

**4 High quality furnishing and interior** available in seven configurations

**5 Tinted glass door and windows** for more visual privacy

**6 Swiss made wooden frame** in 32 different colours – stable with style

# 1 Production

As part of our commitment against plastic pollution, we regularly take part in local clean-up campaigns.

## Made from *upcycled* materials

We give already used materials a new life and recycle them later if necessary. In this way, we ensure that as few resources as possible are consumed.

### The most *sustainable* product on the market

Our entire facility in Switzerland is heated with production waste and our machines are powered by clean water energy. The Chatpods are built from the following recycled materials:

#### Recycled cardboard

The Chatpod's chassis is made of several layers of super-light cardboard, which give the product its clean and timeless shape.

#### PET bottles

The distinct and robust form is further enhanced by an acoustic outer cladding made from recycled PET bottles. The same recycled bottles are also used for the felt-like interior finish, which provides Chatpod's guests with excellent acoustics and absorption of outside noise.

#### Sawdust

The frame made of pressed sawdust makes the Chatpod reliably robust and later receives the unique colour.

#### Car tyres

Connecting elements made from old car tyres seal the box.

### *Social* responsibility

We co-produce the metal parts used in the Chatpod with local foundations and professionals with support needs, giving numerous people a meaningful daily structure.

In the fight against the use of single-use plastic and the resulting pollution, we support the global Trash Hero movement and regularly participate in local clean-up campaigns.

2  
*Acoustics*

# First class *soundproofing*

As specialists in room acoustics, we know very well how to control annoying noise. Chatpod has been carefully designed by acoustics professionals and built to provide the greatest possible sound insulation: from the inside and outside.

## **Engineered by** *acoustic experts*

Private conversations do not leak out of the Chatpod, and office noise is not perceptible inside. Depending on the location, the additional acoustic cladding on the outside of the Chatpod also improves the general acoustics in the open-plan office. In this way, we create the perfect basis for a productive working atmosphere.

## *Scientifically* **tested**

Together with the local Lucerne University of Applied Sciences and Arts (HSLU), we have scientifically tested Chatpod for sound insulation. Speech level reduction is 28.2 dB, according to ISO 23351-1, the standard for this product category. This outstanding acoustic performance allows Chatpods to be placed in close proximity to office workstations without conversations being perceptible from the outside. Ask us for the detailed test report if you are more interested.

# A wide range of *colour combinations*

In collaboration with London-based trend scouts Colour Hive™, we have developed a colour collection of 32 shades. Divided into eight colour families, each tells its own unique story. Choose the exterior colour of your Chatpod from our collection and create a unique design object that blends seamlessly into any space.

## Acoustic material made from *recycled* PET bottles

For every square meter of our ARCHISONIC® acoustic absorber, we can meaningfully recycle 88 plastic bottles and turn them into a high-quality and sustainable building material. In this way, we at Impact Acoustic can turn millions of bottles into a meaningful product life cycle every year. ARCHISONIC® is Cradle-to-Cradle certified and has been awarded the ECO construction label "Eco 1".

## *Matching* frame colours

The frame colour of our Chatpods can also be customised to suit your individual preferences. Choose from 12 different colours in our colour collection.

We will be happy to send you a free sample box on request so that you can evaluate the texture and colour of our material at your leisure.

# ARCHISONIC®

## Quiet Neutrals

In an ever-connected increasingly urban age, we are all at times in search of a moment of silence. With this in mind, we look to the quieter elements of nature as inspiration for a series of calming and balanced neutrals.

## Warm Naturals

While there is much to be hopeful about, we find ourselves living in a time of uncertainty. To counter these feelings of anxiety, we are drawn to environments that reassure and hold us in a virtual hug.

## Living Greens

Environmental awareness and a deepening appreciation of biophilia drives a desire for ever more green spaces.

## Elemental Blues

From frozen glaciers to ever changing skies and vast oceans, this collection connects on an elemental level with the three states of water.

# ARCHISONIC®

## Soothing Pastels

With the evolution of millennial pinks and the emergence of neo-mint, the bandwidth of neutrals has increased, and we see diffused soothing pastels take their place as neutrals of the future.

## Colour of choice

All colours from the NCS colour system can be ordered on request and at an extra charge.

# Easy and *quick* assembly

All Chatpods come with easy to understand assembly instructions. The components of our products are pre-assembled and ready-made before shipment. On-site assembly can then easily be carried out by two members of the facility management staff or other persons with some manual skills.

## Connect and *chat*

In just about 20 minutes, our smallest configuration, the telephone booth (Chatpod 185), is assembled and ready for use.

All that is needed for the installation is a small ladder and a spirit level and you're ready to start.

## Assembly times

Configuration	Time (minutes)
Chatpod 185	20
Chatpod 300	30
Chatpod 350	45
Chatpod 700	90
Chatpod 1200	120

# 5 Hygiene

## ***Hygienic*** **and clean**

PET fibres do not provide a breeding ground for germs and therefore have antibacterial properties, as do the glass and metal parts. The ARCHISONIC® material is made of dyed fibres that do not fade even when aggressive detergents and disinfectants are used. As a result, not only alcohols or aldehydes, but also products containing active chlorine can be used to disinfect the acoustic cladding of the Chatpods.

### **Quick disinfection *without wiping***

Due to the strong odor of chlorine-containing agents, we recommend disinfectants with a fast-drying alcohol solution (75%) for daily cleaning of the Chatpods and disinfectants with a long-term effect (e.g. Pantasept disinfectant spray) for weekly cleaning.

Upon request, we offer Microban® antimicrobial protection, which prevents bacteria and fungi from thriving on our material.

### ***Automatic ventilation* system**

Clean and fresh air is provided by a powerful automatic ventilation system inside the Chatpod. We have designed the ventilation in a way that it does not cause any disturbing noise during concentrated work.

# Flexible *0% Leasing*

All Chatpod models can be used immediately in the configuration of your choice, with no upfront investment. Our attractive 0% monthly rates give you the freedom to make important business decisions. You choose your model and we take care of all the formalities and process your leasing application quickly and easily.

## Your *advantages* at a glance

### **Independence**

You do not strain your bank's credit lines or your balance sheet, and you retain liquidity for further investments.

### **Planning**

You spread the cost of the Chatpod over its useful life of four years and pay the instalments with the income you generate from using the Chatpod.

### **Flexibility**

You work in one of the most modern office spaces on the market and do not tie up your capital in furniture that depreciates over time.

### **Service**

We take care of the formalities and process your leasing application quickly and easily with our Swiss leasing partner.

## Our *conditions*

We offer an attractive interest-free lease. We offer all Chatpod configurations for a four-year term. At the end of the contract, you decide whether you want to keep the Chatpod, return it or extend the term.
