aw	0.50	0.80	0.90	0.85	0.85
Acoustic class	C	C	B	B	B

The name speaks for itself - Mute Fit always fits. This smart acoustic panel was designed to match every size and surface. The panel is made from PET Felt, a recycled material with soft appearance and pleasant felt texture. Inspired by a draped curtain, its asymmetric pattern combines many different flat and curved sections. It ensures that any piece cut out of the panel had flat sides and could be seamlessly connected with the rest of the installation. Mute Fit is available in 11 unique colour blends, offering a great alternative to bare walls.

Designed by **De Vorm**

Product overview

Weight 7 kg
PET Felt thickness 10 mm

Certifications

- Determination of sound absorption report
- EN 13501-1:2018 Fire classification of construction products and building elements (tested on panels with fire retardant treatment)

Care & Maintenance

For regular care, we recommend dusting or vacuuming PET Felt occasionally. Most stains can be easily cleaned with water. It is advised to dab the contaminated surface with a dry cloth while it is wet. Do not rub PET Felt to avoid excessive pilling and let the material dry naturally. If water is not sufficient, stubborn stains can be removed with professional cleaning products like the James cleaning set.
